

## GREEN UPGRADE PROPOSAL FOR RESIDENTIAL BUILDINGS

JES is pleased to offer you Residential Heating and Cooling Services, to achieve optimal thermal comfort with reduced energy use, lower operational costs with minimum impact on environment.

### What We Do:

- Conduct a site investigation to determine the projected annual energy consumption, heating and cooling loads, associated GHGs emission and the annual cost of energy consumption.
- Determine the best options for you from a selection of equipments/energy upgrades including any rebates. A report will provide details of costs, energy savings, emission reductions for each path.
- Review the report with you and decide on how you want to proceed.
- Obtain quotations from our list of qualified contractor/installers.
- Determine your choices and how you wish to finance them.
- Oversee the signing of the contracts and ensure the work is done properly.
- We charge \$300 + HST to conduct our analysis which is put towards any improvements you make. If you decide not to proceed, the charge is not refundable.

### What You Do:

- Sign application and agreement to proceed along with cheque for \$339 that will only be cashed if you decide not to proceed with our offer.
- Decide on the options you want and the means of financing.
- Sign the contracts acceptable to you with guarantees and product warranties and the required deposits or financing.
- Facilitate the installation of equipments/upgrades at site.
- Complete payment in full or make monthly payments as required.
